I **am, strictly speaking, a Broker,** that is to say, I do not purchase or sell any thing on my own account, therefore have no interest at stake but that of my customers.

All prices, unless positively stated to the contrary, are for prompt cash.

**I do not issue price lists,** for the reason the trade papers furnish all needed information of that kind. The changes of the market are so rapid, price lists, aside from being a guide to values, do not represent the actual market. I am always prepared to report by mail or telegraph the best that can be done for any particular brand or age.

All figures printed in regard to exported whiskies are based on information obtained from the Export Storage Company, and can be depended on as absolutely correct.

The figures of current production, withdrawals, and stocks in the State of Kentucky since July 1, 1891, are based on reports received monthly from the various Collector's offices in the State.

When not otherwise stated, all figures of quantities herein represent gallons.

**I respectfully ask a share of your orders to buy or sell Whisky.**

GEORGE C. BUCHANAN.

# R. MONARCH,
## DISTILLER

## Old Style Hand-made Sour Mash

# • WHISKIES •

OWENSBORO, KY., April 30, 1892.

### FINE WHISKY FACTS.

The "KENTUCKY CLUB" whisky was the FIRST whisky ever produced under the brand "club," and gained a world-wide and very enviable reputation, as also did the "R. MONARCH," for their fine body, flavor, etc. Of such note was this whisky, that since the goods were first produced there HAS been imitating brands springing up every day, and from every section of the country, so much so that parties have been stopped by COURTS AND US. We desire to state that now, as when the goods were first made, these goods have no equal in point of body, flavor, and bouquet.

The Kentucky Club, R. Monarch, and T. J. Monarch are to-day made the same as they were twenty years ago, and will continue to be made in the same old style so long as the present management exists.

We are not for cheap goods, but for quality ; that, we know, will always keep us near to our customers.

Respectfully,

R. MONARCH.

**J. M. ATHERTON, President.** **P. L. ATHERTON, Vice-President.**

**FRANK MILLER, Secretary and Treasurer.**

***THIS CORPORATION,*** *organized July* 1, 1881, *owns and controls the* ***Atherton, Mayfield, and Carter Distilleries,*** *and the Atherton, Mayfield, Clifton, Windsor, Carter, Roanoke, Howard, Hinde, and Brownfield brands of Bourbon Whiskies, and Atherton, Indian River, and Carter Ryes.*

***THE ATHERTON BRAND*** *was established in* 1867, *the Mayfield in* 1870, *and the other brands purchased or established since that date.*

***THE GENERAL OFFICE*** *of the Company is in Louisville, while the distilleries are situated forty-five miles south of Louisville, near New Haven, Nelson County, Kentucky, in one of the most famous regions in the State for the production of fine whisky.*

***FROM THE SMALL FRAME BUILDING,*** *erected in* 1867 *by Mr. J. M. Atherton—the Atherton distillery, with a capacity of eight barrels of Whisky per day —this business has expanded until the plant as it now stands consists of three brick distilleries, with a capacity of* 225 *barrels per day; ten brick warehouses, having total storage capacity of over* 100,000 *barrels; cooperage works where* 225 *barrels can be turned out daily; cattle barns, machine shop, offices, etc., more than twenty-five acres being embraced in the premises.*

**Stocks of Whisky in the Hands of Wholesale Liquor Dealers in the United States.**

## The

# J. M. ATHERTON COMPANY

***THE PLANT*** *is connected with the Louisville & Nashville Railroad by three miles of track, owned and operated by The J. M. Atherton Company.*

***ALL OF THE BUILDINGS*** *except cattle barns are of brick, over* 11,000,000 *brick having been made and laid on the place since* 1878.

***THE DISTILLERIES*** *are thoroughly equipped with the most improved machinery and distilling apparatus, and are kept scrupulously clean.*

***THE WAREHOUSES*** *are dry and well ventilated, and are thoroughly heated by steam—more than* 60,000 *feet of steam pipe being used for this purpose; and two independent batteries of boilers supply the steam. The warehouse windows have glass in them, and the interiors are kept at uniform temperature the year round. No expense has been spared in the cooperage or warehouses to bring the whisky to the highest point of maturity possible to be obtained in the shortest time, consistent with the preservation of all the qualities and characteristics of high grade sour mashes, Bourbons, and Ryes. As the result of this care and large expense our Whiskies do actually mature very rapidly, and are ready for consumption at from two to three years of age—the great bulk being taken out of bond before the maturity of the tax. This will be clearly seen by referring to the table on page* 21, *where special attention is asked to the withdrawals of the* 1889 *and* 1890.

***ATHERTON, WINDSOR & CARTER.***

# THE CRYSTAL SPRINGS DISTILLERY COMPANY,

LOUISVILLE, KY.

DISTILLERS OF

## "Crystal Spring" Hand-made Sour Mash and "Garland" Fire Copper.

# THE "CRYSTAL SPRING"

ESTABLISHED IN 1863,

Is made on the old fashioned plan "STRICTLY HAND-MADE SOUR MASH."

The grain used in the manufacture of these goods is of the very best that can be had, the water is, as the name indicates, pure as crystal, and the cleanliness is perfect, and no other distillery in the State can compare with it as to this point. ∴ ∵ ∴ ∵ ∴ ∵ ∴ ∵ ∴

# THE "GARLAND."

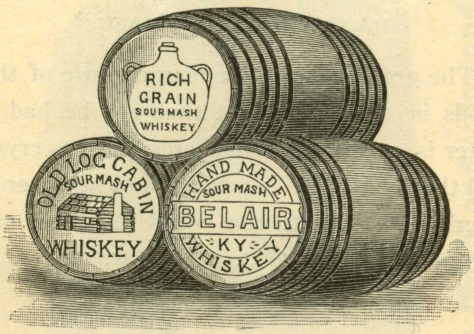

ESTABLISHED IN 1880,

Is a pure SWEET MASH FIRE COPPER containing 40 PER CENT SMALL GRAIN,

not inoculated with strained slop; and it is believed that this is the only brand of FIRE COPPER in Kentucky or elsewhere that is made on the old fashioned plan. ∵ ∴ ∵ ∴ ∵

# "CANADIAN CLUB" Whisky.

(REGISTERED BRAND.)

The age and genuineness of this Whisky are guaranteed by the Excise Department of the Canadian Government, by certificate over the capsule of every bottle. From the moment of manufacture until this certificate is affixed the Whisky never leaves the custody of the Excise officers.

No other Government in the world provides for consumers this independent and absolute guarantee of purity and ripeness.

Our Whiskies are all matured in barrels, in warehouses warmed by steam during the cold seasons, and having a capacity of 80,000 barrels, equal to 4,200,000 wine gallons.

Our "CANADIAN CLUB" is an absolutely pure and thoroughly matured Whisky, without any flavoring matter whatever, and therefore peculiarly adapted for medicinal use.

We have never put up a bottle of Whisky other than in bond and under the immediate supervision of the Inland Revenue officers. Consequently no goods purporting to be ours are genuine without the certificate referred to above.

## IMPORTANT NOTICE AND CAUTION.

The high reputation of our brand has brought out a number of more or less close imitations of our labels, etc., and the official stamp of the Canadian Excise has been boldly counterfeited in more than one instance.

We therefore warn consumers and respectable dealers against these pernicious brands, and would draw attention to the following facts:

We are the only Distillers in Canada of the name of WALKER.

We have the exclusive right to use the word "Club" in connection with Whisky distilled in Canada.

We use only the finest quality of bottles, capsules, labels, etc., while, so far as we have yet seen, those of our imitators are as inferior as is their Whisky.

And we inform the unscrupulous parties who are engaged in putting up and selling counterfeits of our goods that we will prosecute them to the fullest extent of the law.

# FOR BOILERS

Of HIGH TYPE,

SUPERIOR METAL,

and PROPER CONSTRUCTION,

WRITE

C. J. WALTON,

Proprietor of "The Jos. Mitchell Boiler Yard,"

1219 W. Main Street, LOUISVILLE, KY.

N. B.—We make a specialty of Boilers adapted to hard service, such as Distilleries, Breweries, Sugar Plantations, Coal Mines, and Blast Furnaces, and particularly recommend our improved five-flued Boilers as economical fuel consumers and great steam makers.

## From Mida's Criterion,

Nov. 16, 1891.

"We have been recently favored with the beautiful show-card of 'RICHLAND' Whisky by Mr. George Herzog, Cincinnati, O. Although we have already passed the age of ecstacy when looking at the features of a lovely woman, yet there must be a sparkle left in us, for it became kindled when we gazed at the loveliness of feature which so entranced us that we involuntarily pronounced it the 'Goddess of Richland.' Her spirituelle aspect denoted that in some land rich with the bouquet of spiritual product she had become imbued with Richland spirit. We feel confident that the beautiful and artistic creation will largely contribute to the already pronounced success of the 'Richland,' and which this excellent whisky so justly deserves."

***Special Notice to the Trade:***

THE

# Peoria Malting Company

MANUFACTURERS OF

CHOICE GRADES OF ALL KINDS OF

# MALT

THIS MALT HOUSE was established in 1872 by Messrs. KIEFER & WOOLNER, on a small scale, and has steadily increased until the output now is **400,000** Bushels annually. We do not claim that our MALT can walk or talk, but we do claim that, properly handled, it will perform its functions in the mash tub better than any MALT in the market, for reasons we give on another Page.

## The Peoria Malting Company,

**PEORIA, ILLINOIS.**

# To Distillers Everywhere!

BEING intimately acquainted with the process of the manufacture of Whisky, from the raw grain until it reaches the barrel, we claim, and are demonstrating every day in some of the largest distilleries in the United States where our MALT is used, that we can deliver a MALT more suitable for your purposes than other Maltsters. We treat MALT for distilleries different from MALT for brewing purposes, and by placing a trial order with us you can convince yourselves of the correctness of our statement. We solicit correspondence, and shall be glad to send samples with bottom prices. . . . . .

Very truly yours,

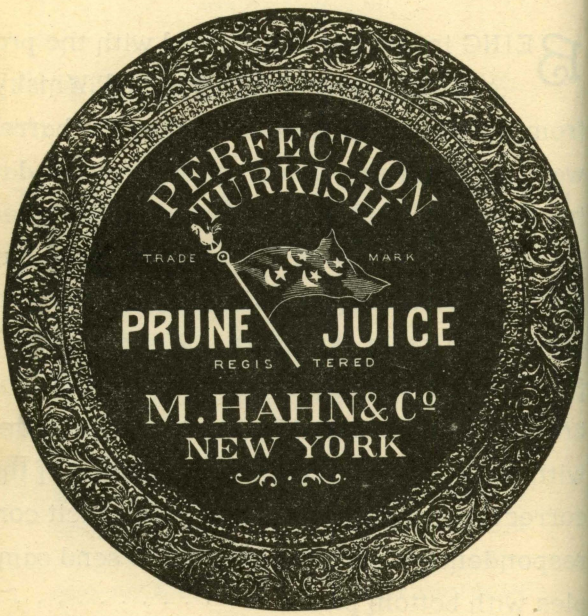

***The Peoria Malting Company,***

# CONCERNING BARRELS.

***To the Kentucky Distillers who are not using The Chess & Wymond Co.'s Barrels:***

*The trade demands a better barrel than the old hand-made one. We are making it. Some of the points of superiority are:*

***Absolutely dry timber.*** *We carry a stock of over two millions of staves.*

***Perfect charring.*** *Our patented charring apparatus gives fine dark color to the Whisky.*

***Heavy Steel Hoops,*** *giving* 30 *per cent. more binding force. They are driven home by powerful machinery.*

*Our* ***Jointing, Trussing,*** *and* ***Headrounding*** *machines are all of the latest and most improved design, and do their work perfectly.*

*We supply twelve of the fourteen Louisville distillers, and as many more in the State. Every one of them will endorse our claims.*

*We have been making Whisky Barrels for fifteen years, and have never lost a customer.*

*We ask you to give our barrel a trial. Put a hundred or two in your racks, and compare outage.*

*For heated warehouses we especially prepare barrels that are unequaled.*

*In our opinion the barrel question is important enough for you to investigate our methods of manufacture. We will take pleasure in driving you out to our works at any time, and explaining how we make a barrel. We may save you some "outs."*

*Sincerely yours,*

***CHESS & WYMOND CO., Louisville, Ky.***

# THE M. V. MONARCH CO.

DISTILLERS OF

## Fine Kentucky Sour Mash Whisky,

OWENSBORO, KY.

We think it in place for us to call the attention of the trade to the following concerning our brands of whisky, and append the certificate of the Hon. John Feland, Collector of Internal Revenue for this, the Second District of Kentucky. Our brands, "M. V. Monarch," "Sovereign," "Jockey Club," "Kentucky Tip," "John Hanning," "E. C. Berry," "Cliff Falls," "P. E. Payne," "Maryland Rye," and "Kentucky Cyclone," are in the strictest sense of the words sour mash whiskies. They are first mashed in *small tubs*, one and one half bushels at a time, with spent beer (sour slop), where the mash *sours for twenty-four hours*, then the contents of these small tubs are broken up and run into the fermenters and *ferment for ninety-six hours*, a liberal proportion of small grain being used. Then they are *singled in copper* and *doubled in copper by furnace heat.* Nothing but the *finest of corn* and the *choicest of malt and rye* is used. We can recommend them to the trade *as the finest of Kentucky sour mash whiskies.*

They are stored in the best and most improved modern warehouses, heated by steam, and improve in quality rapidly. We guarantee outs and proof on each and every barrel. Yours very sincerely,

THE M. V. MONARCH CO.
*By M. V. Monarch, Pres.*

I, John Feland, Collector Second District, Ky., do hereby certify that the foregoing description of making the whisky under the several brands of the M. V. Monarch Co., to my personal knowledge and observation, is strictly true in every detail.

JOHN FELAND, Collector.

Owensboro, Ky., Feb. 13, 1892.

# GÉLIEN & CO.

MANUFACTURERS OF

# SUGAR COLORING,

## 155 MAIDEN LANE, NEW YORK.

THE value of *Pure, Reliable Sugar Coloring* is fully recognized as of the greatest importance by all users of this article. That the use of imperfect coloring oftentimes causes a total loss of hundreds of dollars of valuable goods (at a cost of but a few cents in the value of the sugar coloring itself) is an experience from which few indeed among the trades have escaped, and such experience with many is still fresh in memory.

The poor and unreliable qualities of sugar coloring in the market are generally due to same being *over-burnt*, which invariably causes such color to cloud and deposit, spoiling the goods in which used, affording proof that the makers of such goods are lacking in practical experience, or dependent on pretended knowledge of so-called "*sugar burners*," or upon *ordinary labor*, reliance upon which constitutes a principal reason for failure to turn out a proper article.

The undersigned have made the manufacture of *Sugar Coloring* a careful study and specialty for many years. This experience, combined with scientific research in the development of new processes, has enabled us to make our plant the most modern and perfect, and probably the largest in operation, for the manufacture of this article. Our success is based upon the correct knowledge of *How to Burn Sugar*, attainable only through many years of practical experience at the "Kettle," and by the use of most careful and sound judgment, because the operation is not merely mechanical, but intelligent, varying according to conditions, proper application of heat, quality of sugar used, etc.

Another most important matter necessary to success, and often omitted where makers depend on their hired help simply, is the testing of coloring during its evolution and when made, neglect of which is a prime cause why so much unreliable coloring finds its way on the market. Each batch made by us is first *Filtered* by an improved process, whereby the coloring is *absolutely freed from any sediment;* it is then carefully tested to "Standard" before leaving our works. Therefore we can guarantee our manufacture exceedingly brilliant, and warranted never to cloud or deposit, but to remain stable and unchangeable in the goods in which used, our quality holding the trade wherever introduced.

Our Sugar Coloring may be relied upon at all times to be of an unvarying strength of coloring matter, the highest possible to attain coincident with brilliancy; so that any one, having once obtained his gauge or measure, has it always.

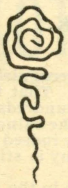

Gelien & Co.'s Sugar Coloring excels all others for Quality, Purity, Brilliancy, and Strength, and will meet every possible want where this article is used, giving satisfaction to the most exacting. We shall be pleased to furnish sample and quotation on application, and trust you may give us an opportunity to convince you of the superior merit claimed for our goods.

Yours truly,

GÉLIEN & CO.

# "The Champion"

"THE CHAMPION" is in its FOURTEENTH year and has subscribers in over 800 cities and towns scattered over 32 States and Territories.

*It is the best advertising medium for the trade.*

Distillers and jobbers should remember that the advertisement of their special brands in a paper of such wide-spread circulation among the retail dealers, largely assists instead of interfering with the trade of those wholesale dealers who handle their goods. It creates an increased demand, and the saloon keeper will not apply to the distiller directly, but to the wholesale firm with whom he deals. Ultimately the distiller gets the profit.

## OLD KENTUCKY WHISKY

Put up in cases, for use in the Home, Hospital, and Sick-Room.

## OLD "COON HOLLOW" WHISKY

In cases (12 bottles to the case).

Purity guaranteed. Bottled at the Distillery. Price, $15 per case.

**The "COON HOLLOW" Whisky** is distilled in the Crown Centre of the Fine Whisky Belt of Kentucky.

It is especially adapted for use in the Family, Hospital, and Sick-Room, and is recommended by the leading physicians of this country for its medical properties. This Company guarantees the purity of every package bearing our unbroken seal.

# IF YOU CARE

**TO INCREASE YOUR BUSINESS,**

BUY EITHER THE

# "Coon Hollow" or "Big Spring"

# WHISKY

These brands are advertised in the territory covered by our patrons, and their recognized superior quality will add to your profits when once distributed to your trade. The leading jobbing houses of this country carry the "COON HOLLOW" and "BIG SPRING."

## The Nelson County Distillery Co.

**LOUISVILLE, KY., and COON HOLLOW, KY.**

The jobbers who buy the "COON HOLLOW" and "BIG SPRING" WHISKIES are the brainy men of the trade. They see that their money is invested in good salable brands of Whisky that always have a standard market value. It is just as easy to patronize an active Distillery Company as it is to patronize those dying of Dry Rot.

## The Nelson County Distillery Co.

**LOUISVILLE, KY., and COON HOLLOW, KY.**

## Wanted an Inventor who can Dispel Fogs.

The "London Times" says that if such an affliction as a London black fog of a week's duration were visited upon New York, American genius would rise to the occasion and invent some method of dispelling it. More than one newspaper has cited the case of the rainmakers in the United States with a view to stimulating scientific research in the matter of vanquishing King Fog.

### *To the Wholesale Wine and Spirit Trade:*

*Particularly outside of London, it is not of so much importance to know how to vanquish King Fog as to be able to furnish a perfectly pure and mellow whisky without having to stand the expense of carrying same for years in bonded warehouses.*

*It is a fact admitted by the ablest blenders in the "United States," as well as several of the largest blenders in Great Britain and Ireland, that one gallon* ***"Barrett's Unrivalled Prune Juice"*** *will mellow and ripen 40 gallons of New Whisky as much as three years of storage will, and at a cost of less than One Cent per gallon.*

***"Barrett's Unrivalled Prune Juice"*** *is* ***THE ONLY PERFECT PRUNE JUICE EVER MANUFACTURED,*** *and* ***THE ONLY ONE*** *which is guaranteed not to cloud Whiskies.*

*Write for sample, which will be sent prepaid; also pamphlet, "How to Achieve Success in the Wine and Spirit Trade," and "How to Tell a Perfect Prune Juice."*

**BARRETT & CO.**

*C. W. CRAIG & CO., San Francisco,*
*Agent for Pacific Coast.*

*SOLE MANUFACTURERS,*
***43 Front St., NEW YORK.***

# A Perfect Prune Juice

## HOW TO TELL IT.

TAKE two white glass bottles, each containing one quart, and mark them Nos. 1 and 2; then nearly fill each with spirits or new whisky 100-proof; to bottle No. 1 add one ounce of the ***"Barrett's Unrivalled Prune Juice,"*** and to No. 2 add one ounce of any other brand (none excepted); mix well and cork, and set aside for twenty-four or forty-eight hours, after which time hold each bottle up to the light and examine carefully, so as to ascertain if there is a cloud or sediment in either. You will find that the bottle No. 1, which contains the "*Barrett's Unrivalled*," is bright as crystal, with not a particle of cloud or sediment, and also that the spirit is vastly improved in both taste and flavor. Our "Prune Juice" is the only one that will stand the above test, hence it is invaluable for bottlers and blenders of fine whisky, and for all high-class dealers who appreciate a really meritorious article. Beware of the poor compounds that are being offered as being like "Barrett's Unrivalled." Make the above test, and judge for yourself.

# Greenbrier Distillery Company

· · · · DISTILLERS OF · · · ·

# "GREENBRIER"

DISTILLED to meet the demand for the finest Sour Mash Whisky, mashed by hand in *small tubs* and fermented, per instructions contained in the late circular of the Commissioner of Internal Revenue, regulating and designating the manner of fermenting Sour Mash from Slop Mash and Sweet Mash Whisky. Said circular caused much fear and uneasiness amongst nearly all the distillers in the State who seek for "big yield," rather than quality, and whose houses should, in justice to all concerned, have been surveyed, and the product branded Sweet Mash, instead of misleading the trade by branding all such stuff *Hand-made Sour Mash Whisky*. The management of the GREENBRIER DISTILLERY hailed the circular as an act of justice to them, as they strictly comply with the requirements contained therein, as to the distillation of a *Pure Hand-made Sour Mash Whisky*.

## "OLD TAYLOR" DISTILLERY, No. 53,

## 7th District of Kentucky,

FEBRUARY 9, 1892.

MESSRS. E. H. TAYLOR, JR. & SONS,

FRANKFORT, KY.:

AS U. S. STOREKEEPERS, IN CHARGE OF THE OPERATIONS OF YOUR "OLD TAYLOR" DISTILLERY, No. 53, WE STATE THAT THE METHODS EMPLOYED AT SAID DISTILLERY ARE STRICTLY ON THE HAND-MADE, SOUR MASH, SMALL STILL, PURE COPPER PRINCIPLE.

THE MASH IS MADE BY HAND IN SMALL TUBS.

THE SCALD IS MADE WITH SOUR SPENT BEER FROM A PREVIOUS DISTILLATION,

THE FERMENTATION IS CONTINUOUS.

NO YEAST WHATEVER IS USED.

THE BEER IS BOILED IN TWO SINGLE-CHAMBERED COPPER STILLS.

THE RESULTING SINGLINGS ARE BOILED IN A SMALL, OLD-FASHIONED KETTLE-SHAPED COPPER STILL, OVER OPEN FIRE, AFTER WHICH THE WHISKY IS CONVEYED TO THE RECEIVING ROOM, AND THERE BARRELED.

EUGENE CRAIG,
U. S. STOREKEEPER.

WM. R. OWEN,
U. S. STOREKEEPER.

---

## COLLECTOR'S OFFICE,

## 7th District of Kentucky.

LEXINGTON, FEBRUARY 9, 1892.

I HEREBY CERTIFY THAT EUGENE CRAIG AND WM. R. OWEN ARE STOREKEEPERS ASSIGNED TO DISTILLERY AND WAREHOUSES OF E. H. TAYLOR, JR. & SONS, No. 53, IN THE SEVENTH DISTRICT OF KENTUCKY.

THOS. C. McDOWELL,
COLLECTOR.

# The Belle of Nelson Distillery Co.

DISTILLERS OF THE

# "BELLE OF NELSON"

**OFFICE, NEW HOPE, NELSON CO., KY.**

***Main Office, 123 and 125 East Main St.*** ***LOUISVILLE, KY.***

## A WORD TO THE WISE.

Energy and printers' ink are the greatest friends that an article of genuine merit has; especially is this true in the great city of New York, whose people have not time to hunt up the good things of life, but are willing and able to pay not only for the article but for the cost of bringing it to their attention. An evidence of this is the wonderful progress The Belle of Nelson Distillery Co. have made in introducing their great brand the "Belle of Nelson" in our market. Eighteen months ago this whisky was known in our city to a very limited extent. The knowledge of it was brought here by those who had visited old Kentucky, the dark and bloody ground, and whilst there supplied themselves with the "Belle of Nelson," which has great renown at home. From this small acquaintance coupled with extensive and shrewd advertising this brand has become the fashion in New York. No first-class saloon, hotel or grocery store is considered complete without their shelves and counters are well loaded with the now familiar Flint Glass bottle with blue crescent on the label, which every one knows at a glance contains this old and superior whisky.

*There may be many others just as good in Kentucky, but how are the millions of people in New York and immediate vicinity to find it out if the owners hide it under a bushel?*

If you would place your whisky where the "Belle of Nelson" is, seek the mediums that they have sought, the leading one of which is this paper, and after twelve months trial, if you do not succeed as they have done, then it is because your whisky has not the merit. The "Belle of Nelson" is one of the highest priced whiskies in the land, and this fact instead of being a drawback is positively an assistance to it, as our people are not seeking a cheap article, but want the best that money can buy. The distillery that produces this celebrated brand is comparatively a small one in the hills of Nelson County, Kentucky, where sour mash whisky was first made, and if they are as successful with it here in the next eighteen months as they have been in the past eighteen, New York and immediate vicinity will come very near using its entire product. "A word to the wise is sufficient."

*—WINE AND SPIRIT GAZETTE, N. Y., April 21.*

# THE BELLE OF NELSON.

### *Editorial in Medical Progress, February, 1892.*

This name carries with it roseate thoughts of the beauty of Kentucky's fair daughters; yet the name in this connection shall refer the reader to another source of inspiration which at banquets and other occasions is often a helpmeet of latent oratorical powers. We may just as well say now that we refer to the Belle of Nelson Whisky. It is famous not only in Louisville and throughout Kentucky as an article which is of the purest make that can be found. Physicians here, in order that their patients may get a pure quality of whisky, order it. When patients call for the Belle of Nelson they are sure to get the best whisky, and all prudent physicians should not fail to give them particular instructions to always ask for the Belle of Nelson.

---

### *Editorial, Frank Leslie, April 7, 1892.*

It is not within the province of journalists to call editorial attention to advertisements, and especially to an article, paradoxical though it be, that is so universally used and condemned; but, favoring the human side of life, in this particular instance we have accepted an advertisement of the Belle of Nelson Distillery Co., only after an investigation of the Internal Revenue Records at Washington. This investigation shows the Belle of Nelson to be one of the very few distilleries that produce a strictly hand-made sour mash whisky, made upon the old-fashioned principles; and such an article being required, and absolutely necessary in many instances, we commend this whisky to those who need a stimulant.

---

### *Editorial, Army and Navy Register, March 26, 1892.*

Noticing advertisements in the illustrated papers and periodicals of the Belle of Nelson Whisky, we were tempted to examine the Internal Revenue Department, where the methods of every distiller in the United States are kept, and it is with pleasure that we found that their whisky is a pure hand-made old-time sour mash, as fully sustained by the records; and to those requiring a stimulant it would seem that there is nothing better than this famous whisky, made in the wilds of Nelson County, Ky. We recognize the evil of liquor drinking as well as the beneficial effects when taken in moderation, consequently, we can recommend this whisky to the Army and Navy without having any personal acquaintance with any one interested in the manufacture of it.

# OLD PEPPER WHISKY

*To the Public*

*It having come to our notice that inferior Whiskies are being sold, put up in imitation of the package we have introduced and sold for years past as the* ***Distillery Bottling*** *of our celebrated old* ***Pepper Whisky,*** *we deem it our duty to warn Dealers and the Public against these base imitations*

*The object of the imitators is obvious: "To force upon the public a spurious article under the name and guise of a Whisky, which, having been made by three generations of the Pepper family on the same formula, for more than a hundred years, and introduced to the world at a great outlay of labor and expense by the present firm of Jas. E. Pepper & Co., has become a staple brand, and is in demand everywhere by an appreciative public."*

ORIGINAL PACKAGE

*To guard our interests as well as those of the Trade and Public, we have* ***patented*** *our* ***Trade Mark,*** *and besides the suits already instituted against certain imitators and infringers, we shall begin others, if necessary, and press them vigorously to the fullest extent of the law.*

*Dealers refilling our empty bottles, are liable for damages, and will be prosecuted.*

*The Old Pepper Whisky* ***bottled at our Distillery only,*** *when aged under our personal supervision is put up in cases of 12 white flint-glass bottles with a* ***Body-label,*** *a* ***Back Caution-label,*** *and a* ***Signature-strip*** *running over the cork and bottle-lip, as shown on the accompanying fac-simile illustrations.*

*Dealers and consumers should insist on getting this package and no other.*

*Our Mr. James E. Pepper is the only one bearing the name of* ***Pepper*** *who has been engaged in the* ***Distillery Business*** *in this country, for more than twenty years, and therefore any Whisky offered to the trade as genuine* ***Jas. E. Pepper Whisky*** *is fraudulent, unless distilled by us.*

*Respectfully,*

Jas. E. Pepper & Co.

*Lexington, Ky.*

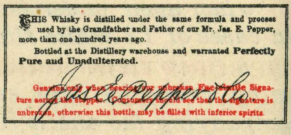

OVER

# T. B. RIPY,

DISTILLER OF

# FINE WHISKIES

**LAWRENCEBURG,**

ANDERSON COUNTY, - - - KENTUCKY.

PROPRIETOR OF THE POPULAR BRANDS:

T. B. RIPY,

ANDERSON CO. SOUR MASH,

M. S. BOND,

J. A. McBRAYER,

S. T. WILLIS.

THE

# Export Storage Company,

## Bankers and Warehousemen.

*We have now storage rooms at Bremen and Hamburg, and ship to either place according to the wishes of our patrons.*

*Under the present regulation it is necessary, in order to export domestic spirits, that we receive instructions at least two weeks before the expiration of the warehouse bonds, i. e., by the 15th of the same month in which the whisky was made. Therefore, as May, 1889, Whiskies have to be under export bond before June 5, 1892, and June, 1889, Whiskies before July 5, 1892, the orders for the exportation of such goods must be in our hands on or before May 15, 1892, or June 15, 1892, respectively.*

*We furnish all bonds and make out all papers.*

*We are prepared to make liberal advances on any quantity of Export Whiskies that may be shipped as soon as the distillers' warehouse receipts are placed in our hands.*

*Having now abundance of room, we store only on upper floors of first-class warehouses.*

### TAX-PAID WHISKY.

*We are also prepared to tax-pay and care for whiskies in this country.*

*Yours respectfully,*

**The Export Storage Company.**

It will be seen from the foregoing tables that of the vast quantity of 275,435 barrels of the crops of 1880, 1881, and 1882 whisky exported in the years 1884, 1885, and 1886, there now remain abroad but 6,803 barrels, this stock embracing not alone the product of Kentucky, but also that of Pennsylvania, Maryland, and West Virginia, stored abroad.

These tables further show there is a steady large consumptive demand for these aged whiskies, as evidenced by the reduction of stocks from 17,282 barrels of the crops of 1880, 1881, and 1882 remaining abroad May 1, 1891, to 6,803 barrels on May 1, 1892.

In the same period of time the stock of the crops of 1883, 1884, 1885, and 1886 remaining abroad has been reduced from—

| | | |
|---|---|---|
| Crop of | 1883 | 7,585 bbls. |
| " | 1884 | |
| " | 1885 | |
| " | 1886 | 13,615 " |

On 1st May, 1891, to—

| | | |
|---|---|---|
| Crop of | 1883 | 4,605 bbls. |
| " | 1884 | |
| " | 1885 | |
| " | 1886 | 2,295 " |

On 1st May, 1892.

Quite a large percentage of the stocks now remaining abroad is owned by parties who contemplate and require its use in their own distributing business, so that it can not be said to be on the market.

The ownership of the balance of the stock is concentrated in a very few hands, and it is noticed that every now and then some particular brand, the stock of which is nearly exhausted, is advanced and sold considerably beyond the general market.

With stocks so nearly approaching exhaustion, it must be plain to all that future prices do not depend on the supply, but rather on the views of holders.

Prices are still much below a normal scale for whiskies of such age.

It cannot be too strongly urged upon all consumers to anticipate their wants for the future by purchasing liberally now.

**I have close business relations with the owners of a very large percentage of these old Whiskies, and can execute orders on the most favorable terms.**

# The Original and Genuine

# PRUNE JUICE

NICHOLAS RATH & CO.

30 S. WILLIAM ST.,

NEW YORK,

**ESTABLISHED 1869.** ***Sole Manufacturers.***

THE Original and Genuine Prune Juice produces in all Whiskies, Brandies, Wines, etc., the same fine mellow taste and delicate flavor precisely as age does, and still its presence can not possibly be detected.

As is the case with all articles of special merit, the Original Prune Juice has been most extensively imitated, generally by persons who know nothing whatever as to its components, but who produce nasty sweet stuff made from steeped fruit and sugar, or still worse, from chemicals, which but reduce the proof, and not seldom, owing to the ignorance of the manufacturers as to how they should be fined and cleared, discolor the Whiskies in which they are used, thus doing more injury by one package than would pay for ten times the quantity of the Genuine Article.

The Original Prune Juice completely covers the objectionable smell in new Whiskies, a quality possessed by none of its imitations.

Samples (delivered free) and quotations forwarded on application.

# EXPORTATION.

## LOUISVILLE PUBLIC WAREHOUSE COMPANY.

The trade is familiar with the facts of exportation, the heavy movement in this direction in 1884, 1885, and 1886, and the cause thereof, the great crops of 1880-81 and 1881-82.

Experience has shown there are certain climates unfit for the proper storage and maturity of American whiskies, and that there are again certain other climates well adapted for this purpose; and this experience is in favor of Bremen and Hamburg, as against any other ports of the same advantages as to warehouses, safe custody of the goods, and shipping facilities. In all cases where American whiskies have been stored in proper modern warehouses in those cities they have returned to this country in good condition as to proof and improvement.

We publish views herein of the Hamburg and Bremen warehouses controlled by the Louisville Public Warehouse Company, which, it will be seen, are eminently fit and equal to any thing of the same kind in our country; and the trade is further assured that the many years of experience has taught these foreign warehousemen every requisite of the business, and has also developed cheaper and at the same time better means of carrying on all the details of the business, both in transportation, handling and storage. Members of the trade who were abroad during the past summer, and who had occasion to inspect these warehouses, unanimously award them the highest praise and recommendation. The greater part of the exports of the crop of 1885-86 are stored in these houses, and are now returning to this country in the best condition.

The class of storage being found satisfactory and equal to the same storage in this country, the question of exporting naturally resolves itself merely into a question of economy or finances, and in this direction the following tables may be found of interest, and are calculated to show the entire round-trip expense should the whisky not be sold abroad as expected. The tables are based on an estimate of forty gallons to the barrel and assumption of equal outage at either place of storage (although the foreign outage has been found to be less), one year storage at either place, and a calculation of loss of three gallons the first year on home store goods in transfer from distillery warehouse to free warehouse, handling, period of storage and in transit to the storeroom of the wholesale dealer.

### EXPORTED AND RETURNED.

| To California. | Per Gal. |
|---|---|
| All expenses into foreign warehouse | $0.0625 |
| One year storage and insurance | .0175 |
| Returning to California | .0775 |
| | $0.1575 |

| | Per Gal. |
|---|---|
| Tax on three gallons lost first year | $0.0675 |
| One year storage and insurance | .0300 |
| Interest one year on tax | .0625 |
| Railroad freight to California at $1.28 per 100 | .1000 |
| | $0.2600 |

The above table is calculated in cents per gallon.

It will be seen that the greatest advantage is in the California shipment and the least in those to the Central States, which latter are, of course, at the entire expense of the home transportation both by ocean and rail in exporting, against very slight transportation expense in the tax-paying and home-stored goods.

Exportation has also the further and continued advantage of a saving of the tax and the interest on the same, on the further outage each year the goods remain abroad additional to the first year calculated above, against a corresponding disadvantage in this same regard in the home stored goods. Exported whiskies have the still further advantage of a three years bonded period in the custom warehouse on the return of the whisky to this country and a consequent saving of interest on the tax for that period. Duty is now collected on imported liquors on the regauge made *on arrival* in this country, but it is hoped the further advantage will soon be had of a regauge and assessment of duty *on withdrawal*. This question is involved in the suit of the Louisville Public Warehouse Company *versus* the Collector of Customs at Louisville, which case has recently been heard and submitted in the United States Court, and will soon be decided.

The McKinley Bill provides that where duty is assessed by *weight* the assessment is to be made *on withdrawal*, and the point to be adjudicated is whether weighing is part of the process of gauging. It is the general opinion of the trade that our point is well taken and that we have a good case. The ten-per-cent penalty for the second and third years of the Customs Bonded Period has been removed.

It is suggested to parties intending exporting to require through all-rail transportation to the seaboard, ocean transportation by regular steamers, and a rate quoted by the Export Companies to include every thing complete into the foreign warehouses. The cheaper part rail and water lines to the seaboard have been found unsatisfactory as involving much extra handling detrimental both to the cooperage and contents; besides other risks, "tramp" steamers are dangerous owing to their irregularity, uncertainty as to previous cargoes (often petroleum or tobacco), and higher Marine Insurance, and rates involving frequent surprising extras are calculated to disturb the necessary harmony between the owner and the exporters. There is to be noted whether the storage rate includes fire insurance in the warehouse or whether the same is an extra item. Lastly, deal only with reliable parties who are known as such and having property within the jurisdiction of the United States, subject to our courts to compel fulfillments of contracts, and consult others in the trade as to their experience in these matters. See that the warehouse receipt is a plain binding negotiable instrument, and free of the extraordinary conditions and stipulations often imposed.

*We are prepared to make liberal advance on whisky exported through us. Our rates are guaranteed equal to those of other parties.*

## SPIRITS LOST BY FIRE IN WAREHOUSES FOR LAST NINETEEN YEARS.

The following statement shows the quantity of spirits lost in distillery warehouses by fire during each of the last nineteen calendar years. As it shows also the stock of spirits in warehouse at the close of each of the *fiscal* years 1872 to 1891, both inclusive, the percentage of loss on the stock held may be readily computed:

[Quantities in taxable gallons.]

| YEARS. | In Bond June 30th. | Total Loss. |
|---|---|---|
| 1872 | 10,103,392 | 28,399 |
| 1873 | 12,917,462 | 9,901 |
| 1874 | 15,817,709 | 124,602 |
| 1875 | 13,367,253 | 81,493 |
| 1876 | 12,984,896 | 99,102 |
| 1877 | 13,258,794 | 7,487 |
| 1878 | 14,088,773 | 29,913 |
| 1879 | 19,212,470 | 2,465 |
| 1880 | 31,363,869 | 14,620 |
| 1881 | 64,648,111 | 198,251 |
| 1882 | 89,862,645 | 175,216 |
| 1883 | 80,499,993 | 396,299 |
| 1884 | 63,502,551 | 416,609 |
| 1885 | 54,724,916 | 109,030 |
| 1886 | 58,096,620 | 181,198 |
| 1887 | 65,145,269 | 112,722 |
| 1888 | 61,030,236 | 18,925 |
| 1889 | 68,509,288 | 32,252 |
| 1890 | 89,718,271 | 1,160,769 |
| Total | 838,852,518 | 3,199,253 |

Average loss, $\frac{38}{100}$ of 1 per cent.

The loss during the six months ended June 30, 1891, was 41,289 gallons, the stock on hand June 30, 1891, being 112,921,457 gallons.

## REMARKS.

The act of July 1, 1862, went into operation September 1, 1862.

The act of June 30, 1864, provided that a tax of $1.50 per gallon should be levied and collected on all distilled spirits, except brandy distilled from grapes, from July 1, 1864, to February 1, 1865; on and after February 1, 1865, the tax should be $2 per gallon.

The act of December 22, 1864, provided that the tax of $2 per gallon should take effect January 1, 1865, instead of February 1, 1865.

So far as the other acts of legislation referred to in this table relate to the tax on spirits, they went into operation immediately on their passage, except the following:

The act of March 3, 1865, took effect April 1, 1865.
The act of July 13, 1866, took effect September 1, 1866.
The act of June 6, 1872, took effect August 1, 1872.

**George C. Buchanan, Whisky Broker, 122 E. Main St., Louisville, Ky.**

TREASURY DEPARTMENT,
OFFICE OF THE COMMISSIONER OF INTERNAL REVENUE,
WASHINGTON, D. C., April 9, 1892.

GEORGE C. BUCHANAN, Esq., 122 *E. Main Street, Louisville, Ky.*

SIR: Your letter of 5th instant, relative to information desired for publication in your statistical work entitled "FINE WHISKY FACTS," has been received.

In reply you are informed that a table of the different rates of taxation that have prevailed on spirits since the creation of the present internal revenue system, giving the date of each enactment, will be found on page 384 of my report for the year ended June 30, 1891, a copy of which will be forwarded to your address.

I would also say that there was no limitation as to the bonded period under the rate of 20 cents; under the rate of 60 cents imposed by the act of March 7, 1864; and under the rates of $1.50 and $2.00.

The act of July 1, 1862, provided that the duty on spirits stored in a bonded warehouse should be paid when and as it is sold or removed from such warehouse for sale.

The act of June 30, 1864, provided that the duty should be paid before the spirits were removed from the distiller's warehouse, unless removed in pursuance of law. This act also provided that the spirits might be removed from the distiller's warehouse to another warehouse, from which they might be withdrawn after payment of the duty imposed by law, or to be redistilled or exported.

The act of July 13, 1866 while providing a more elaborate system of warehousing, did not limit the bonded period.

Under the provisions of the act of July 20, 1868, which fixed the tax on spirits thereafter produced at 50 cents per gallon, the time in which such spirits might remain in bonded warehouses was fixed at one year from the date of the bond. This act also limited the time in which spirits then in warehouse should be withdrawn to within nine months after the passage of the act, and practically fixed the rate of tax to be paid on such spirits at 60 cents per proof gallon; that is to say, at 50 cents by the 1st section, and 10 cents additional by the 59th section of the act.

Under the provisions of an act approved April 10, 1869, the time within which spirits in bonded warehouse July 20, 1868, were required to be withdrawn, was extended until the 30th of June, 1869, but subject to an additional tax on each proof gallon deposited and bonded in warehouse, at the rate of one cent for each month after the 20th of April, 1869, and until withdrawn.

All spirits produced under the 50 cent and 70 cent rates were allowed to remain in warehouse one year from the date of the warehousing bond, and all spirits produced under the 90 cent rate were required to be withdrawn within one year, until by joint resolution of March 28, 1878, the time was extended to three years, which applied to spirits thereafter entered for deposit in warehouse, and, under certain conditions, to spirits covered by bond taken within one year prior to the passage of the resolution.

Under the act of May 28, 1880, the time limit was also fixed at three years from the date of the warehousing bond.

Under the act of March 3, 1877, a provision, applicable to grape brandy only, was passed fixing the time at three years from the date of the original gauge as the time in which such spirits might remain in bond, and by the provision of an act approved October 18, 1888, the privilege was extended to brandy distilled from apples or peaches.

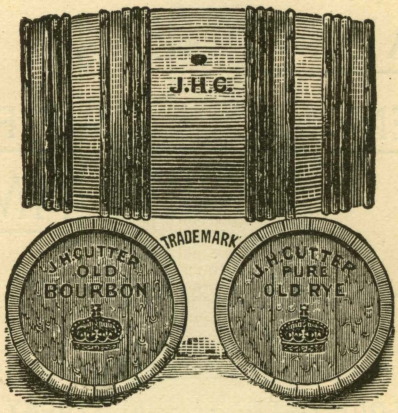

Respectfully yours, JOHN W. MASON, *Commissioner.*

## REVIEW OF THE SITUATION.

"In the edition of 'FINE WHISKY FACTS,' issued under date 1st December last, it was shown that during the twelve months ending June 30, 1889, there were withdrawn from bond in the State of Kentucky of the

| | | |
|---|---|---|
| Crop of 1885 | 2,117,461 | gallons. |
| " 1886 | 11,397,006 | " |
| NOTE.—Exported in 1889, 1,539,792 gallons. | 13,514,467 | " |

During the twelve months ending June 30, 1890, there were withdrawn from bond of the

| | | |
|---|---|---|
| Crop of 1886 | 3,036,766 | gallons. |
| " 1887 | 9,396,553 | " |
| NOTE.—Exported in 1890, 340,270 gallons. | 12,433,319 | " |

During the twelve months ending June 30, 1891, there were withdrawn from bond of the

| | | |
|---|---|---|
| Crop of 1887 | 1,997,295 | gallons. |
| " 1888 | 2,455,530 | " |
| | 4,452,825 | " |

"A comparison of these figures shows the withdrawals of three- to four-year-old whiskies for the last fiscal year ending 30th June, 1891, were about 7,500,000 gallons less than the withdrawals of the same age whiskies for either of the two previous years, and the result of the small withdrawals the past season must be a vacuum of stocks in dealers' hands to a corresponding extent, so that the stock of 1889 whiskies finds a market bare of withdrawals of previous crops, and consumption having no reserve stocks of 1888 and 1887 whiskies to supply it, must of necessity concentrate upon the supplies of 1889.

"When the present cheapness of 1889 whiskies as compared with prices that have prevailed for 1888, 1887, and 1886 whiskies in the past two years is considered, inviting and encouraging consumption, and with the enormous consuming power of the country, the consequence of the bountiful crops of the past season, the consumption of this age of whisky must be beyond all precedent, and the small percentage of existing stocks that it may be found necessary to export, or to tax pay for aging purposes, can not be larger than should under any circumstance be so held. The stocks of all ages prior to 1889 are so nearly exhausted a liberal supply of 1889's will be needed for aging purposes."

The course of the market for 1889 whiskies during the past four to six months has more than borne out the favorable view of the situation expressed in the foregoing extracts.

Consumption has been pressing, largely anticipating tax maturities, and is now not only taking stocks of 1889 whiskies at the scale of prices that prevailed in December last, but in nearly all instances at largely advanced prices, and the conclusion is irresistible, that the dearth of supplies of the inspections prior to 1889 was much greater than was generally believed.

Force is added to the opinion that holders require the stocks of 1889 for the needs of immediate consumption, by the very small volume of the exports of the 1889 crop. (The monthly exports are shown in statements on pages 35, 37, 39, 41, 43.)

"In the 1st December, 1891, edition of FINE WHISKY FACTS it was estimated the withdrawals for the year ending 30th June, 1892, would be (see page 33 of that edition)—

| | | |
|---|---|---|
| Crop of 1888 | 598,740 | gallons. |
| " 1889 | 10,631,792 | " |
| " 1890 | 7,361,708 | " |
| " 1891 | 5,187,653 | " |
| " 1892 | 3,000,000 | " |
| Total | 26,779,893 | " |

And estimating the production of the year ending 30th June, 1892, at 25,000,000 gallons, it was estimated we would reach 30th June, 1892, with stock remaining in bond as follows:

| | | |
|---|---|---|
| Crop of 1889 | 3,000,000 | gallons. |
| " 1890 | 21,831,401 | " |
| " 1891 | 25,634,708 | " |
| " 1892 | 22,000,000 | " |
| Total | 72,466,109 | " |

The withdrawals for the current season, 1st July, 1891, to 31st March, 1892, have been as follows: (See table on page 49.)

| | | |
|---|---|---|
| Crop of 1888 | 347,172 | gallons. |
| " 1889 | 6,112,680 | " |
| " 1890 | 4,968,480 | " |
| " 1891 | 3,537,254 | " |
| " 1892 | 2,335,435 | " |
| Total | 17,301,021 | " |

The withdrawals for the months of April, May, and June, 1892, it is estimated, will be as follows:

| | | |
|---|---|---|
| Crop of 1889 | 3,600,000 | gallons. |
| " 1890 | 2,000,000 | " |
| " 1891 | 1,500,000 | " |
| " 1892 | 1,000,000 | " |

Which will bring the total withdrawals of the year ending 30th June, 1892, to—

| | | |
|---|---|---|
| Crop of 1888 | 347,172 | gallons. |
| " 1889 | 9,712,680 | " |
| " 1890 | 6,968,480 | " |
| " 1891 | 5,037,254 | " |
| " 1892 | 3,335,435 | " |
| Total | 25,401,021 | " |

| | | |
|---|---|---|
| The production 1st July, 1891, to 31st March, 1892 (see table on page 47), amounted to | 18,643,798 | gallons. |
| Estimated production for April, 1892 | 6,000,000 | " |
| " " May, " | 5,500,000 | " |
| " " June, " | 2,191,637 | " |
| Total estimated crop of the season ending 30th June, 1892 | 32,335,435 | " |

If these estimates of withdrawals and production for the months of April, May, and June prove correct, we will reach the 30th June, 1892, with a stock remaining in bond—

| | | |
|---|---|---|
| Crop of 1889 | 3,350,368 | gallons. |
| " 1890 | 22,879,932 | " |
| " 1891 | 25,944,920 | " |
| " 1892 | 29,000,000 | " |
| Total | 81,175,220 | " |

As against stock remaining in bond 30th June, 1891—

| | | |
|---|---|---|
| Crop of 1888 | 347,172 | gallons. |
| " 1889 | 13,063,048 | " |
| " 1890 | 29,848,412 | " |
| " 1891 | 30,982,174 | " |
| Total | 74,240,806 | " |

By reference to pages 112, 119, 121, 123, 125, and 127 the methods and facilities for exporting whisky will be found exhaustively set forth by the Export Storage Company, of Cincinnati, and the Public Warehouse Company, of Louisville.

These two great Companies have so perfected the system that the exportation of a lot of whisky to Europe is now as simple and free from complication as an ordinary shipment from Kentucky to any domestic point.

"Especial attention is called to the tables of the Louisville Public Warehouse Company, comparing the cost of export with the cost of home-storage, showing whisky can be exported and returned to this country after one year cheaper than it can be carried an equal period at home, a striking commentary on the injustice of American law, as applied to the article of whisky.

"Aside from former facilities for exportation, foreign capital is now offering in unlimited amount to carry at cheap rates liberal advances on whiskies stored in Bremen and Hamburg.

"Such is the facility for export, and such the financial facility for carrying exported stocks held abroad, that no holder need longer consider the maturity of the tax as a factor entering into his calculations; he has simply to transfer his stocks from the Kentucky warehouse to the Bremen or Hamburg warehouse, where they can enjoy all the advantages of an unlimited bonded period."

## NORMANDY DISTILLING COMPANY.

*R. F. BALKE, PRESIDENT.*

LOUISVILLE, KENTUCKY.

☞ABSOLUTELY THE BEST.☜

In considering the present situation, it may be concluded the trade have made up their minds, that through exportation they practically have all the advantages of an unlimited bonded period, minus the cost of exportation, and the buoyancy of the market may be attributed to the elimination from trade conditions of the enforced payment of taxes in advance of the needs of consumption, and whilst the stock of 1890's on 30th June, 1892, 22,879,932 gallons appears large, the same causes that have operated to absorb stocks of 1889's will continue in force to take off the supplies of 1890's, and even if a few million gallons are exported, or tax paid, and carried in dealers' stocks, they will be required for aging purposes at remunerative prices.

Attention is called to the fact that whilst stocks on the 30th June, 1891, were:

| | | |
|---|---|---|
| Crop of 1890 | 29,848,412 | gallons. |
| " 1891 | 30,982,174 | " |
| Total | 60,830,586 | gallons. |

The stocks on 30th June, 1892, will be:

| | | |
|---|---|---|
| Crop of 1891 | 25,944,920 | gallons. |
| " 1892 | 29,000,000 | " |
| Total | 54,944,920 | gallons. |

A gain in the statistical condition of the 1891 crop as compared with the 1890 crop of 3,903,492 gallons, and of the 1892 crop as compared with the 1891 crop of 1,982,174 gallons.

The large estimated production of the current season to 30th June, 1892, 32,335,435 gallons may prove a blessing in disguise, as it will tend to restrain the market on a normal low basis, and keep prices of Kentucky Whiskies within the reach of a large volume of legitimate consumption.

A standard Kentucky Whisky is the best and safest alcoholic beverage in the world, and especially suited to the American climate in which a stimulant of its specific character is a necessity. Wherever it is once used it never loses its foothold, and if the Kentucky distiller will be satisfied with a legitimate manufacturing profit, and if dealers will be satisfied to place stocks before the trade at a scale of prices allowing a reasonable profit over carrying charges, and if speculation does not interfere to prevent, consumption of Kentucky Whiskies, encouraged by their merit and the cheapness at which they can be afforded, will greatly increase over the present large volume.

**GEORGE C. BUCHANAN.**

LOUISVILLE, KY., 21st May, 1892.

# What

## the Whisky Trade and Distillers want.

Tax reduced to 50 cts.

Alcohol free in the Arts and Manufactures.

Unlimited extension of bonded period.

Privilege of drawing off whiskies at distilleries at any proof desired.

Privilege of bottling in bond.

Privilege of one removal in bond.

Date of inspection to be burnt on head of barrel.

Gross, tare, and net weight to be burnt on head of all barrels filled by distillers and rectifiers.

Privilege of blending in bond.

Privilege of warehousing all whiskies made at same distillery in one warehouse.

A decision of the Courts that gauging is weighing, so that the tax on reimported whisky will be payable on actual number of gallons withdrawn from custom warehouse instead of as at present upon number of gallons at date of reimportation.

—*WESTERN BROKER, August 15, 1891.*

## REVIEW OF WHAT THE WHISKY TRADE AND DISTILLERS WANT.

The list of reforms printed on preceding page is published herein for general information.

The tax should be reduced to 50 cents, in order to provide the consumer an older, consequently healthier beverage, at the same cost of a raw and inferior article now consumed.

The bonded period should be unlimited, because it is a correct principle that no tax should be collected until the article taxed is wanted for consumption; and a government that is collecting a tax of 90 cents a gallon on an article that costs 25 to 30 cents a gallon to produce certainly can afford to wait for the tax until the article is wanted for actual consumption.

It is one of the curiosities of modern legislation that an article that has paid into the National Treasury *nearly fourteen hundred million dollars* (*see statement on page 132 of this book*), should be the subject of such inimical legislation.

Under the Internal Revenue Laws the payment of the tax on spirits is now enforced at the end of three years, whilst under the laws governing the foreign trade of the country the owner can, at the expiration of the three years, export his spirits to a foreign country, hold it there as long as he pleases, bring it back after the expiration of any length of time, and no matter if half the quantity may have leaked out, pay the tax only on what is brought back, and is given the privilege of holding it three years after its return to this country in customs warehouses before paying the tax; not alone that, but the privilege of shipping it in bond to and from any point in the country where there is a custom house.

The wisest men in the trade have for ten years past been urging that the "bonded period be made indefinite," and the whisky be permitted to remain quietly in the distillery bonded warehouses until wanted for consumption, instead of being shipped to foreign countries at great expense to the American owner, and to the great profit of foreign Steamship Companies and warehousemen.

The time of the average American Congressman, however, is so much taken up with saving the country politically, he apparently has but little time to study what affects the material interests of the country, and will not take the trouble to investigate laws governing the trade in distilled spirits resting on incorrect foundation of principle, which in the last ten years have deliberately taken millions of dollars out of the pockets of American laborers to put it into the pockets of foreign laborers.

If any thing goes wrong in Wall Street, Washington is excited, and the Secretary of the Treasury rushes to New York, seeking the advice of the leading minds as to what help the government can render, and the coffers of the treasury are emptied to arrest disaster, but the great distilled spirits interest of the country, which has paid into the United States Treasury nearly *fourteen hundred millions of dollars* since the imposition of internal revenue taxes, and is now paying in excess of *eighty*

*millions dollars taxes annually*, has learned, after many fruitless efforts, it is almost useless to appeal to Congress for reforms in legislation, and to patiently suffer the burden of existing unwise and improper legislation that at times not only threatens but has frequently produced serious disaster.

It seems positively absurd, and it is a reflection on the intelligence of the law makers of our country that for ten years past they should have witnessed the movement of spirits to and from Europe, not alone at a great expense to the owners but at a large loss of revenue to the government itself, without any effort on the part of Congress to so amend the laws that spirits could remain in bond in our own country instead of in foreign countries.

It would be an act of long deferred justice if Congress would, before it adjourns, pass a bill making the bonded period indefinite. It is an absolute necessity not only for the development of the whisky interest of the country, but the greatest drawback that exists at this date to the development of the wine interests of the country is the limited bonded period which is obsolete in every nation in the world, governed by intelligent men, but the United States.

The privilege of bottling in bond would naturally follow an unlimited extension of the bonded period, and would be a great aid to our distillers in introducing their whiskies into foreign countries.

**George C. Buchanan, Whisky Broker, 122 E. Main St., Louisville, Ky.**

**Table Showing the Allowance of Loss on Whiskies in Bond according to the provisions of the Carlisle Bill.**

The maximum allowance for each of the periods named, in the case of a cask or package of forty or more wine-gallons capacity, may be stated in tabular form, as follows:

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| Not to exceed | 1 | proof-gallon | for | 2 | months | or part thereof. | | |
| " | 1½ | " | for more than | 2 | mths. | and not more than | 4 | mths. |
| " | 2 | " | " | 4 | " | " | 6 | " |
| " | 2½ | " | " | 6 | " | " | 8 | " |
| " | 3 | " | " | 8 | " | " | 10 | " |
| " | 3½ | " | " | 10 | " | " | 12 | " |
| " | 4 | " | " | 12 | " | " | 15 | " |
| " | 4½ | " | " | 15 | " | " | 18 | " |
| " | 5 | " | " | 18 | " | " | 21 | " |
| " | 5½ | " | " | 21 | " | " | 24 | " |
| " | 6 | " | " | 24 | " | " | 27 | " |
| " | 6½ | " | " | 27 | " | " | 30 | " |
| " | 7 | " | " | 30 | " | " | 33 | " |
| " | 7½ | " | " | 33 | " | " | 36 | " |

The maximum allowance for loss on casks or packages of less capacity than forty wine-gallons, and not less than twenty wine-gallons, is limited to one half the amount stated in the above table. No loss will be allowed on casks or packages of less capacity than twenty wine-gallons.

It will be seen that where the loss of spirits while in warehouse does not exceed the statute limit, the tax is to be collected on the proof-gallons contents as shown by the regauge.

Where the loss exceeds the statute limit the tax will be collected on the number of proof-gallons contents, as shown by the original gauge, less only the loss allowed by law.
